

Families

The mission of University Career Services is to provide progressive services and resources to help students choose and prepare for their careers, learn job search skills and find employment.

University Career Services advises students and provide resources on the types of planning and preparation required to help students meet their career goals. This includes internships, job seeking, labor market resources, individual career counseling, workshops, and employer contacts via career fairs, panels, computer technology, and presentations.

The role of UCS is to act as an educational agency, rather than an employment agency. We give students the tools, resources, and opportunities to make sound career decisions, plan for their career, and find internships and jobs. Ultimately the student is responsible for preparing for his or her career goals and for finding the position.

We invite you to explore our site and see what UCS can offer your UNC Student!
