1. Be the Match – Bone Marrow Registry Event
2. Data Technician position – Duke Neurology
3. Spot-a-Spot – UNC Med Derm Interest Group Skin Care Outreach
4. CHEOP Open House

1. Interested in saving lives and improving the health of others? Everyday people are being diagnosed with blood cancers, which have the potential to be cured with a bone marrow transplant. But currently too few people are on the registry for the number of patients seen and diagnosed. We are looking for committed people ages 18 to 44 to serve those in need. This is NOT a resume builder, but a chance to make a lasting impact in someone’s life. On Monday, November 7th come down to Hinton James Study Lounge Wing B to register to be on the Bone Marrow Transplant Registry from 3:30 to 6:30 pm! If you have any questions, please email Gabriella Yacovone: gabri@live.unc.edu or Madison Malfitano: maddym@live.unc.edu

2. Data Technician needed for growing Clinical Neuropsychology Service in the Division of Neurology at Duke University Health System. Responsibilities include administering neuropsychological tests to patients for clinical evaluation and research protocols, scoring test protocols, maintaining a clinical research database, as well as other organizational and support tasks needed for this active clinical service. Will work primarily with Clinical Neuropsychologists, as well as neurologists, psychiatrists, and nursing staff toward the fulfillment of these responsibilities. Great for recent grads looking to gain experience working with patients before medical or graduate school. All applicants should have relevant clinical, research or volunteer experience. BA/BS in psychology, scientific, or other related field required. If interested, please send cover letter and resume to Vicki Dixon at Vicki.Dixon@duke.edu.

3. The UNC School of Medicine Dermatology Interest Group is reaching out for undergraduate volunteers interested in health care professions for the Spot-a-Spot Program. Spot-a-Spot is an educational opportunity aimed at children in local elementary, middle, and high schools focused on skin cancer prevention and sun safety. Volunteers would work with medical students in coming to a classroom for around an hour and giving a presentation on skin cancer and skin cancer prevention. Volunteers would be required to attend a training session before their classroom visit. Volunteering with Spot-a-Spot is an excellent opportunity for pre-health students to gain medical knowledge and teaching experience. If interested or have any questions, please contact paul_skiba@med.unc.edu

4.
Please Join the Carolina Higher Education Opportunity Programs Office for the

CHEOP OPEN HOUSE FALL FESTIVAL

On Wednesday, November 9th
11:00 am-3:00 pm

Student Academic Services Building
SASB South, Suite 2301
