1. Department of Anesthesia Research Study Coordinator
2. Pharm Tech Positions at UNC Hospitals
3. Elon PA Open House
4. ECU School of Dental Medicine Admission Webinar
5. Jefferson’s Department of Medical Laboratory Sciences & Biotechnology Programs

1. The University of North Carolina’s Institute for Trauma Recovery is seeking a highly motivated undergraduate student with an outstanding academic record and a passion for research to apply for a summer volunteer opportunity with the Department of Anesthesiology’s research team. The goal of this research is to advance understanding of the biological processes mediating recovery after trauma, and to use the latest scientific technology to develop individually tailored interventions that promote rapid recovery and prevent chronic symptom development. Candidates must have demonstrated interest in and wish to pursue research training in health-related sciences. Interested individuals should send their CV and a cover letter, describing their background and reason for interest in applying for the position to jenyth_sullivan@med.unc.edu. Information regarding the research group can be found at: https://www.med.unc.edu/anesthesiology/research/UNC-Institute-for-Trauma-Recovery

2. Job Listing: The Central Inpatient Pharmacy and Sterile Products Area at UNC Hospitals are recruiting full-time and per-diem pharmacy technicians. No previous healthcare experience required and flexible shifts are available (Days, Evenings, Nights). Full-time positions include competitive pay and benefits and are great for students taking a gap year in order to pursue a career in a healthcare profession such as medical or pharmacy school. Whereas, per-diem positions are a great part-time job opportunity during the school year or post-graduation. This position will expose you to a nationally-renowned Department of Pharmacy and provide insight into the various intricacies of a large, academic medical center. Technician certification is required and information on how to apply for certification can be found at: http://www.ptcb.org/get-certified#.WPTsWT8ytQ8. Please apply for the available pharmacy technician positions at: https://unchealthcare.taleo.net/careersection/2/jobsearch.ftl?lang=en. Requisition ID Numbers: PHA005STT, PHA005TW, PHA005SZ, PHA005TT or on Careerolina by searching for "pharmacy technician". For additional questions or concerns please contact the Pharmacy Operation Specialists Charles Leighton (Charles.Leighton@unchealth.unc.edu) or Jaleesa Shepherd (Jaleesa.Shepard@unchealth.unc.edu).

3. The Elon Physician Assistant Studies program is hosting an open house on Saturday, May 6, from 9am-12pm. Whether you’re getting ready to start the PA application process this year, or you’re just exploring the idea of PA school, come learn more about Elon’s program. Register online and join us for: Elon PA Open House - Saturday, May 6, 2017
Schedule:
8:30 a.m. – Registration and Continental Breakfast
9:00 a.m. – Welcome
9:45 a.m. – Francis Center Facility Tour
10:15 a.m. – Refreshment Break
10:30 a.m. – Faculty and Student Panel
11:15 a.m. – Financial Planning and Admissions
Contact Jen Medlin, Associate Director of Graduate Admissions, with questions.
jmedlin@elon.edu

4. The ECU School of Dental Medicine would like to a special event coming up next week. As you all may know, the 2017-2018 application cycle opens on June 1st. While we’ve met with a multitude of perspective applicants, it is impossible to meet with each student individually. As a result, we have scheduled an ECU School of Dental Medicine Admissions Webinar for Monday, April 24th from 3-4:30. During this session, we be available to answer questions via video and chat. Please share this with your students, especially those that are planning to apply this summer/fall.

If you have any questions or concerns, please contact me via email or the number listed below.

Attachment: WebEx Info: ECU SODM Admissions Webinar
Monday, April 24, 2017
3:00 pm  |  Eastern Daylight Time (New York, GMT-04:00)  |  1 hr 30 mins

Register (Click here to register or copy this link into your browser)

After your request has been approved, you'll receive instructions for joining the meeting.

5. Are you graduating seniors wondering what they can do with a science background? A 12-month or 2-year graduate degree may be the perfect solution. Jefferson’s Department of Medical Laboratory Sciences & Biotechnology has a variety of options.

- Have them explore a degree in Medical Laboratory Science.

In this program students will gain a solid base in all aspects of laboratory medicine, including 16 weeks of on-site training in clinical laboratory settings throughout the Delaware Valley. These “internships” cover clinical chemistry, microbiology, hematology, and transfusion medicine. Many of these experiences result in job offers!

- Or, they could explore Biotechnology.

Biotechnology is one of the most promising sectors in our nation’s economy and offers opportunities in fields including research and development, manufacturing, molecular diagnostics, forensic science, agri-biotech, and the pharmaceutical industry.

- Finally, we have exciting opportunities in Cytotechnology.

Jefferson’s cytotechnology program emphasizes cellular, molecular and immuno diagnostics, as well as modern management and education. This combination of science and real-world skills gives TJU grads an advantage in the cytotech job market, which includes clinical, research, commercial and cytology laboratories.

With a cytotech degree, science doesn’t only translate into a job, it offers career opportunities in a job market that is expected to grow and with salaries ranging from $60,000 to $80,000 per year.

- All of these Master's degree options are great steps to a stable career or toward doctoral degree programs, including even medical school.

I am happy to assist your students. For more information, please visit:

Don Sharples, Sr. Associate Director of Admissions
