## NACE <br> SALARY SURVEY

Starting salary projections for Class of 2022 new college graduates

DATA REPORTED BY EMPLOYERS

# No experience, no problem. 

Leverage better talent insights to identify graduate potential and hire tomorrow's leaders, today.

## Better tests. Better decisions. Better results.

## Candidate Friendly

Criteria offers a comprehensive suite of both game-based and traditional assessments that candidates can take on any device. 96\% of candidates positively rate their experience using our assessments.

## Improved Diversity

Diversify your new grad hires by focusing on objective qualities that are $4 \times$ more predictive of job performance than traditional methods like resumes and interviews.

## Scientifically Proven

Save time and money with our science-backed assessments that are rigorously validated to predict job success and drive outcomes that matter.

## ABOUT THE SURVEY

The Winter 2022 Salary Survey report contains annual salary projections for Class of 2022 college graduates. The figures reported are for base salaries only and do not include bonuses, commissions, fringe benefits, or overtime rates. The report provides the detailed salary projections by academic major, job position, and degree level, along with breakouts by both industry and geographic region.

The National Association of Colleges and Employers (NACE) obtained the data in this report by surveying its employer members from October 4, 2021, through December 3, 2021. A total of 124 surveys were returned-a $17 \%$ response rate. Of those responding, $7.3 \%$ of respondents were from the New England region, $6.5 \%$ were from the Plains, $12.9 \%$ were from the Rocky Mountain/Far West region, $11.3 \%$ were from the Southwest, $14.5 \%$ were from the Southeast, $12.9 \%$ were from the Mideast, and $34.7 \%$ were from the Great Lakes region. A list of respondents by industry and size, and a partial list of organizations that supplied data for this report can be found in the Appendix.

Salary Survey (ISSN 1520-8648) is available to individuals holding membership in NACE; it is also available on a subscription basis. NACE publishes the Salary Survey report two times a year-January and July. For more information, see www.naceweb.org/store/subscription/salary-survey/ or contact NACE at 610.868.1421.

## SALARY SURVEY ISSUES FOR THE CLASS OF 2022

The Winter issue features starting salary projections by major from employer-provided data. The Winter 2022 Salary Survey report is the first report for the Class of 2022. Data are available by major, job position, industry, and region. There are also data for advanced-degree candidates; the report includes data for 38 master's and 18 doctoral degree disciplines.

The Summer issue serves as the final report for the graduating class-the previous year's class, that is. The report features data provided through the national First-Destination Survey initiative; the data represent actual starting salaries (not projections) reported by graduates to their institutions. Data are by major, region, and Carnegie Classification. The Summer 2022 Salary Survey is the final report on starting salaries for the Class of 2021, while the Summer 2023 Salary Survey will serve as the final report for the Class of 2022.

# HOW TO READ SALARY SURVEY 

## ASSOCIATE / BACHELOR'S / MASTER'S / DOCTORAL

## STARTING SALARY BY ACADEMIC MAJOR | PAGE 8

In this section, you will find the average starting salary according to the major field of study, with no regard to the type of employer reporting the salary. Refer to this section when you want to know the starting salary for a graduate holding a degree in a specific discipline, such as accounting or computer science.

## STARTING SALARY BY MAJOR AND INDUSTRY \| PAGE 19

This section shows data first by the major field of study, then by the type of employer (industry) reporting the salaries. Employer types are listed in alphabetical order under each major. See this section when you want the average starting salary reported by a specific type of employer to a graduate earning a degree in a specific major. (Example: Average salary that chemical [pharmaceutical] manufacturing firms are reporting for chemical engineering graduates.)

## STARTING SALARY BY INDUSTRY AND MAJOR | PAGE 28

This section contains the same basic information as "Starting Salaries by Major and Industry," but in a different order. You will see data listed by a specific type of employer (industry), then according to the average salary by major field of study. Industries are arranged in alphabetical order. Majors are listed under each industry in the typical report order by broad category, then alphabetical within the category. Use this section to find the average starting salary reported by a specific type of employer to a graduate in a specific major. (Example: Majors hired by construction firms and their corresponding average starting salaries.)

## STARTING SALARY BY JOB POSITION PAGE 37

In this section, you will find the average starting salary according to job position, with no regard to the type of employer reporting the salary. Refer to this section when you want to know the starting salary for a graduate hired for a specific job position, such as financial specialists or computer occupations.

## STARTING SALARY BY JOB POSITION AND INDUSTRY (BACHELOR'S DEGREE) PAGE 40

This section shows data first by job position, then by the type of employer (industry) reporting the salaries. Employer types are listed in alphabetical order under each job position. See this section when you want the average starting salary reported by a specific type of employer to a graduate hired for a specific job position. (Example: Average salary that sales positions are projected to earn from finance, insurance, and real estate employers.)

## STARTING SALARY BY INDUSTRY AND JOB POSITION (BACHELOR'S DEGREE) | PAGE 41

This section contains the same basic information as "Starting Salaries by Job Position and Industry," but in a different order. You will see data by a specific type of employer (industry), then according to their reported job positions. Industries are arranged in alphabetical order. Job positions are also listed under each industry in alphabetical order. Use this section to find the projected average starting salary reported by a specific type of employer for a specific job position. (Example: Projected starting salaries reported by miscellaneous manufacturing firms for financial specialists.)

## STARTING SALARY BY REGION AND MAJOR $\operatorname{PAGE} 42$

In this section, you will find the average starting salary according to the major field of study within seven geographic regions (New England, Mideast, Great Lakes, Plains, Southeast, Southwest, and Rocky Mountain/Far West. Note: For the master's and doctoral degree levels, regions have been combined due to limited data.) The regional data are based upon the locations of the participating organizations that supplied information for the majors within each region. The majors are reported in typical report order by broad category, then alphabetical within the category. Averages are provided strictly by major field of study with no regard to the type of employer reporting the salary. Refer to this section when you want to know the starting salary for a graduate holding a degree in a specific discipline in a regional location, such as mechanical engineering majors hired by participants in the Southwest.

## EXECUTIVE SUMMARY

## SALARY SURVEY WINTER 2022 KEY INSIGHTS

## BACHELOR'S DEGREES

- Salary projections for Class of 2022 bachelor's degree graduates are a bit of a mixed bag. This is unlike last year, when employers projected increases in all reported categories of majors at the bachelor's degree level. Projections for the Class of 2022 range from increases of $5.4 \%$ for math and sciences and agriculture and natural resources majors to a decrease of $14.8 \%$ for humanities majors. (See Figure 1.)
- Computer sciences majors are once again projected to be the highest paid group of majors $(\$ 75,900)$ and have the second highest projected increase this year (5.2\%). They were also the highest paid category last year with an average salary projection of $\$ 72,173$.
- Engineering graduates are likely to be the second highest paid, and their average salary projection $(\$ 73,922)$ is up $4 \%$ over last year's average salary projection.
- Class of 2022 math and sciences graduates are also expected to be paid higher starting salaries this year, as their overall average salary projection $(\$ 66,760)$ is $5.4 \%$ higher than the average projection for their counterparts from the Class of 2021. While this is the highest increase of all reported categories in this report, last year's overall expected increase was just $1.3 \%$ for this group of majors.
- The overall average salary projection for business majors $(\$ 60,695)$ is $3.1 \%$ higher than last year's projection. This projected percentage increase is nearly double that of last year's increase, which was just $1.6 \%$.
- Business majors also dominate the list of top bachelor's degree majors in demand with six of the 10 represented in this category. Several business majors-finance, accounting, and business administration/management-and computer science graduates are most in demand at the bachelor's degree level this year as $60 \%$ or more of respondents anticipate hiring them. (See Figure 2.)
- Two engineering majors in particular-electrical engineering and mechanical engineering-also are among the top bachelor's degrees in demand, as nearly half of respondents plan to hire them.

## MASTER'S DEGREE GRADUATES

- Of the four reported categories of majors at the master's degree level for the Class of 2022, half show projected increases and the other half show projected decreases. (See Figure 3.)
- The overall average salary for graduates earning master's degrees in engineering is expected to increase by 5.9\%. These majors are also expected to be the top paid at the master's level, with an overall salary projection of \$85,096.
- While bachelor's degree graduates earning computer sciences degrees are predicted to be the highest paid, at the master's degree level, this group is second $(\$ 82,384)$ after an overall projected $3.5 \%$ decrease for this year's graduates.
- Math and sciences graduates have the highest projected increase in overall average starting salaries (6.7\%), but after their average projected salary was down $7.2 \%$ last year, it appears that they have only made up the ground they lost.
- Master's degree business majors show the largest expected decrease ( $5.9 \%$ ) in average starting salaries among the reported broad categories. However, of the specific majors in demand at the master's degree level, M.B.A. graduates top the list and will be hired by more than $30 \%$ of respondents. (See Figure 4.)

## DOCTORAL DEGREE GRADUATES

- Limited data reported at the doctoral degree level allows for salary projections in just three categories: computer sciences, engineering, and math and sciences. (See Figure 5.)
- Although the projected average salary for graduates in the computer sciences is expected to drop by $4 \%$, they remain the highest paid at the doctoral degree level $(\$ 110,135)$.
- Graduates earning doctoral degrees in the engineering fields have now topped six figures, as their overall average salary is up $6.5 \%$ to $\$ 103,423$. Two years ago, the overall average for Class of 2020 engineering graduates at this degree level was also greater than $\$ 100,000$, but last year's $4.3 \%$ projected decrease dropped it to $\$ 97,136$.
- Average starting salary projections for Class of 2022 graduates earning doctoral degrees in math and sciences are expected to increase by $2.8 \%$ to $\$ 90,439$. This small increase helps to make up for the $15 \%$ drop last year for the Class of 2021, which lowered the overall average salary projection to $\$ 87,933$.
- Overall demand for majors at the doctoral degree level shows interest on the part of employers in all reported categories (computer sciences, engineering, and math and sciences), with the top spot going to mechanical engineering graduates. (See Figure 6.)

## JOB POSITIONS

- Data for salary projections by job position were reported for the first time. Employers were given a list of 17 different job positions; the top 10 highest paid at the bachelor's degree level are shown in Figure 7.
- While some of the positions have extremely limited data, the three highest paid positions do not come as a surprise. With computer sciences, engineering, and math and sciences majors being the highest paid majors at the bachelor's degree level, it follows that the job positions they would most certainly fill have the highest paying salary projections.
- In future issues of NACE's Winter Salary Survey, year-to-year comparisons will be made to see the movement of salary projections by job position.
